

Features Of OnTime Plus

A System Designed With Human User In Mind	
System Structure	<ul style="list-style-type: none"> ■ ELID OnTime Plus Attendance Management System has been created from the perspective of a human user, not a computer by providing intuitive user interface, enabling an end user to operate the system with little or no training at all. ■ A system, which is simple to use yet features-rich -ease of operation by minimal typing or mouse clicking. ■ It allows import and export of data to third party Human Resource Package, eliminating double data entry.
Data Visualization - In 3D !	
Attendance In Chart	<ul style="list-style-type: none"> ■ Display attendance records as bar charts, pie chart, line graph 3D/2D, etc for a better viewing of staff attendance.
Linked To Human Resource Package	
Import Staff Information	<ul style="list-style-type: none"> ■ Staff information can be exported from HR package and imported into OnTime Plus through Import / Export utility.
Export Attendance	<ul style="list-style-type: none"> ■ Attendance Records can be exported from OnTime Plus to Payroll Package in a pre-defined file format for further processing.
Overtime Calculations	
Overtime Mode	<ul style="list-style-type: none"> ■ Provides automatic overtime calculation based on entitlements or overtime schedules.
Overtime Formula	<ul style="list-style-type: none"> ■ User definable formula for overtime.
Year 2000 Compliant	
Y2K Comply	<ul style="list-style-type: none"> ■ All date, year fields in OnTime Plus are 4 digits, thus no confusion. Leap year calculation is based on the standard formula. ■ If the data source keeps 2-digits-year, then the following applies: <ol style="list-style-type: none"> a) Years between 90 and 99 shall be treated as 1990 to 1999 b) Years between 00 and 89 shall be treated as 2000 to 2089
System Requirements	
Personal Computer with a Pentium 100 MHz or higher processor Microsoft Windows 95, Windows 98, Windows NT 4.0 (x 86) or later Minimum 16MB of memory Hard Disk Space : 10MB (Installation); Minimum 200MB (Operation) ELID Time Clock or Door Access Control System

OnTime Plus

Time Attendance Management System

Building on ELID's strength and experiences in Time Attendance Management System, we provide yet another innovative and human oriented design system, with a user interface that is easy to operate and rich in functionality, efficient in reporting and compatible with an open system that caters for future expansion. OnTime Plus Time Attendance Management System enhances and concentrates on collecting, processing, storing and analyzing of clock data, and with a single mouse click, provides comprehensive attendance reporting, which can be specifically customized by users, by means of simple dialog.

Crafted with a networking capability in mind, OnTime Plus bases its communications between computers on TCP/IP, a protocol used by Internet, therefore, paving a way for future integration into the World Wide Web. Hence, with these capabilities of LAN / WEB, it creates an interesting possibility. For example, you can:

- ◆ Browse the company's Intranet for departmental weekly attendance report. Thus, cutting down cost and time in printing and distributing of information.
- ◆ Watch who's coming in to the premises by photo at personal workstation, so long as access rights to the system has been established.
- ◆ Assigning access rights in the management system, to each of the departmental head for browsing of their department's attendance only.
- ◆ Change Time Clock settings from any of the workstations in the LAN, essentially, anywhere in the network.
- ◆ And, more to come ...

Highlights Of OnTime Plus

■ WEB Enabled Attendance

Being in an information revolution arena, OnTime Plus provides a WEB enabled attendance. You can use IE4 or Netscape Navigator or any other web browsers to query departmental attendance records. All you have to do is to add an additional IIS (Internet Information Server) or PWS (Personal Web Server) installed.

■ Comprehensive / User-Defined Reports

In OnTime Plus, there are more than 20 pre-defined reports right there for your convenience. Just a few mouse clicks required. It's flexible and only reports the records that you need and authorized. You can also, create your own reports with ELID's powerful Report Generator, packaged as one in OnTime Plus. Thus, you can save the template for future reuse.

■ Real-Time Attendance

Focusing on an on-line transactions display, OnTime Plus provides a framework for immediate display of transactions received from Time Clocks (ET120x, ET1000) or Door Controllers (EL1200, EL220x). All these, to facilitate a critical and far-sighted faculty for evaluating issues requiring an ethical objective for successful and well-being of staff. This mechanism works in a way where the clock data receives information which then, feeds into the attendance engine and processed right away - updates the attendance screen on-the-fly based on pre-defined criteria (e.g. every 30 seconds, every 10 transactions, etc).

■ Shift / Leave Management

OnTime Plus also has the ability to provide shift schedules where each of the staff can be assigned any shift at any day. Another shift / leave management provided is that of Shift Group and Annual Leave. The shift group function allows staff who works on the same shift to be grouped together. Annual Leave Management is provided for annual leave / off day taken, etc.

■ Networked As LAN (Local Area Network)

Building up with a LAN Ready mechanism, it allows for multiple workstations / multiple users. Hence, we're getting a virtual shipload of information, bringing a heap of lifestyle change, making life easier with an audit trail function that provides tracing of events (who, what, when). But all these, with a security purpose in mind. With the implementation of access rights, it prevents unauthorized access and limits the operator to designated functions only (e.g. Print attendance reports only).

■ User-Friendly Interface - Easy To Manage

The attendance management displays an organizational tree with an absolute clear view of the attendance of the staff. Thus, it saves a lot of effortless time in navigating through the attendance records. In addition, you can just click on the Calendar shown on the screen for daily / weekly / monthly attendance reports based on staff / department / branch. With the implementation of speed buttons, you can gain quick access to most frequently used commands by a single click.
